

We ensure maximum value out of enterprise solutions by delivering business automation and data management strategies that improve operations.

CAPABILITIES STATEMENT

IT Partners, Inc. (ITP) was Founded in 1993. We are a Women Owned, Small Business WBENC Certified full-service Technology Solutions consulting company.

IT Partners has been providing trusted, cost-effective technology services to meet the challenges, goals and innovation needs in the Commercial, Federal, and Intelligence Community Marketplace for over 20 years. We deliver technology lifecycle support from blueprint and design through development and integration, deployment, and sustainment. We are experts in performing software development using an Agile delivery methodology and have a proven track record of full life cycle implementation support for large scale Enterprise Resource Planning (ERP) systems, such as SAP.

We also help agencies innovate, realize real cost savings, and operational efficiencies by leveraging their existing ERP investment and extending its capabilities through RPA, AI, and best of breed platform technologies, and DevOps tools and practices.
